

## WE HARVEST LESS THAN YOU THINK

how long it takes different tree species to mature in different geographies, and on average we harvest only two percent of our

Like you, we want our forests to last forever.

## WE PLANT MORE THAN WE HARVEST

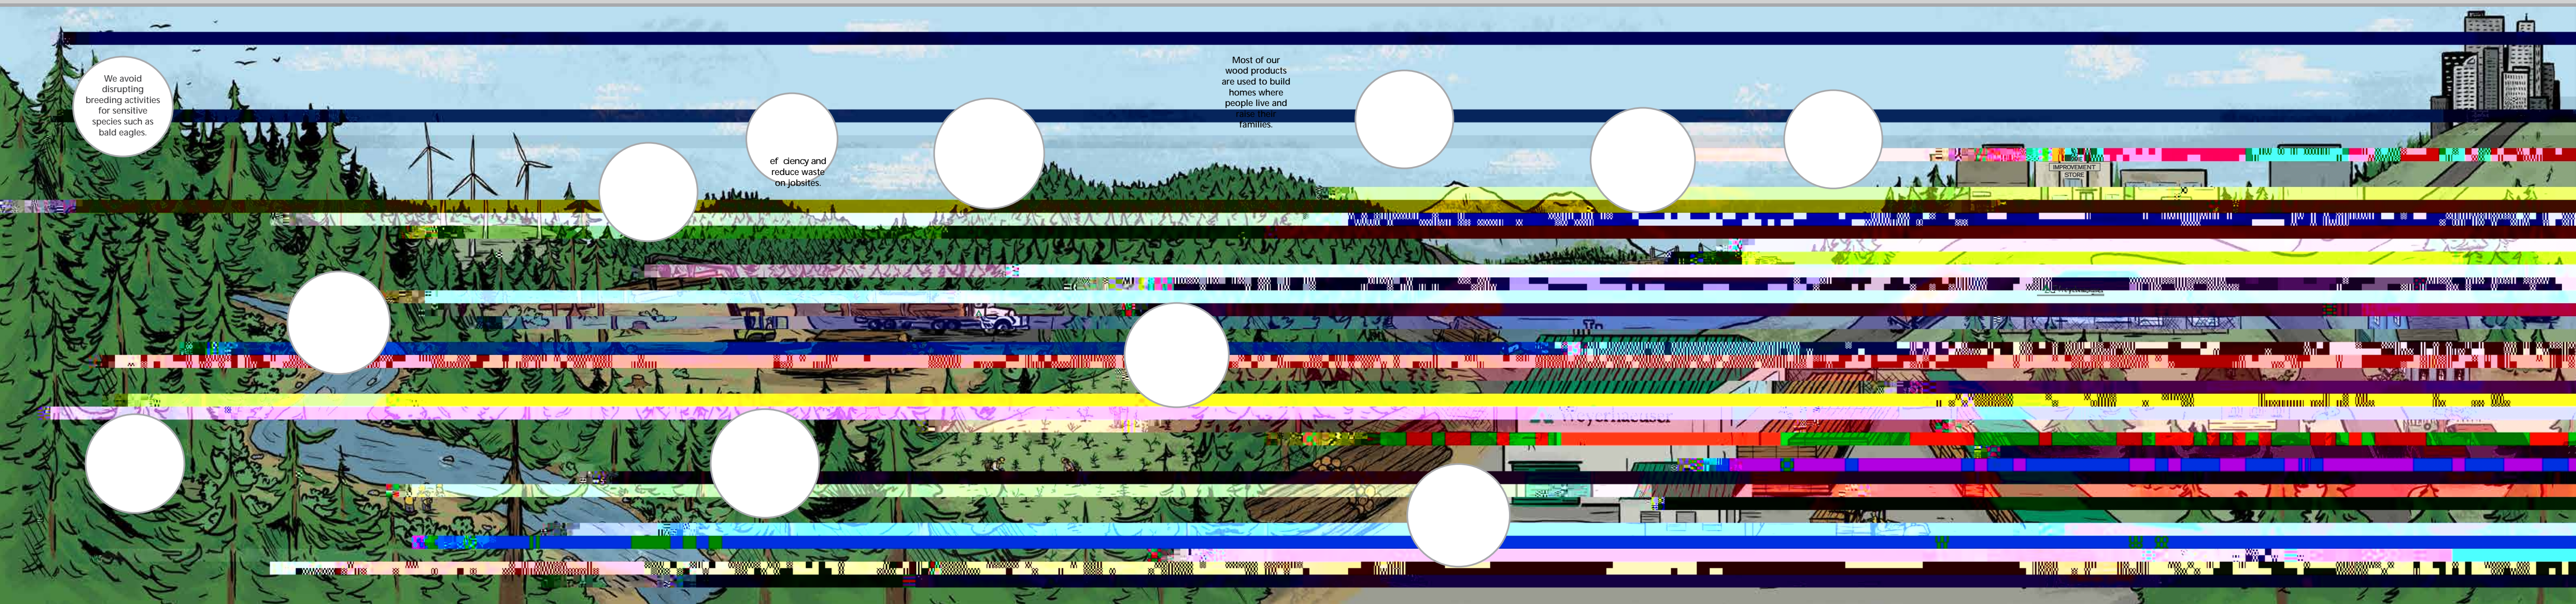

We grow high-quality seedlings in our own r

r

We avoid disrupting breeding activities for sensitive species such as bald eagles.

efficiency and reduce waste on jobsites.

Most of our wood products are used to build homes where people live and raise their families.

## OUR OPERATIONS

## OUR ECOSYSTEM STORY

Our forests provide much more than timber. They are thriving, healthy ecosystems.

## OUR CARBON STORY

Forests and wood products play an essential role in mitigating climate change.

## OUR GREEN BUILDING STORY

Wood is the ultimate green-building material: strong, versatile, reusable and sustainable.

## OUR SUSTAINABLE APPROACH

Sustainability means making smart choices today that ensure success over the long term.
